

RISHI BAGODI

Frontend Developer | Machine Learning Enthusiast | B.Tech Information Science Engineering

📞 9148172926 ✉ rishibagodi@gmail.com github.com/rishibagodi linkedin.com/in/rishi-bagodi

CAREER OBJECTIVE

Motivated B.Tech Information Science Engineering student with a strong foundation in frontend development and a growing passion for machine learning. Seeking internship opportunities to build intelligent, user-facing applications that combine clean UI design with data-driven insights. Eager to contribute to real-world projects, grow alongside experienced teams, and apply skills in Python, JavaScript, and ML to solve meaningful problems.

SKILLS

Programming Languages: Python, C++, JavaScript, HTML, CSS

Databases: MySQL

Developer Tools: Git, GitHub, VS Code

Soft Skills: Teamwork, Analytical Thinking, Willingness to Learn

EDUCATION

B.Tech – Information Science Engineering

Jain (Deemed-to-be) University, Bengaluru, Karnataka | CGPA: 7.9

12th Standard – Pre-University

Base PU College | Percentage: 88%

10th Standard – Secondary School

PSSEMR School | Percentage: 82%

PROJECTS

1. Agri-Netra — Smart Crop Disease Detection & Irrigation Advisory

Tech Stack: React 19, Vite, TailwindCSS, TensorFlow.js, OpenWeatherMap API, Recharts

- Built a fully offline-capable crop disease detection web app using a TensorFlow.js model running directly in the browser — no backend required.
- Implemented FAO-56 Penman-Monteith ET_0 formula to calculate real-time irrigation recommendations using live weather data from OpenWeatherMap API.
- Developed scan history dashboard using localStorage with charts (Recharts) to visualize past disease detections.
- Participated in National Level 24-Hour Hackathon (Vishwakarma'26, CIT) and with this project.

2. EcoFinds — Sustainable Product Discovery Platform

Tech Stack: Next.js 15, React 18, TypeScript, TailwindCSS

- Developed a full-featured e-commerce platform for eco-friendly product discovery built for the INNOVATORS GUILD hackathon.
- Implemented product browsing, cart functionality, user login, and an environmental impact dashboard tracking user sustainability metrics.
- Built with Next.js App Router and TypeScript for type-safe, scalable code architecture.

3. House Price Predictor

Tech Stack: Python, scikit-learn, Flask, HTML, CSS, JavaScript

- Built an end-to-end machine learning web application that predicts house prices using Linear Regression trained on the California Housing dataset.
- Developed a Flask REST API backend that serves predictions, and a responsive HTML/CSS/JS frontend for user interaction.
- Demonstrates full-stack ML deployment: data preprocessing → model training → API → web UI.

4. Personal Portfolio Website

Tech Stack: HTML, CSS, JavaScript

- Designed and built a fully responsive personal portfolio showcasing projects, skills, and contact information.
- Implemented smooth animations, mobile-first responsive design, and deployed on GitHub Pages.

HACKATHONS & ACHIEVEMENTS

- Participated in National Level 24-Hour Hackathon — Vishwakarma'26, hosted at Cambridge Institute of Technology, Bengaluru (Apr 2026) — Team Gaslighters, AdAstra Student's Club.
- Participated in INCEPTRIX Hackathon 2026— Jain University, Faculty of Engineering & Technology (Jan 2026) — Theme: Beyond Intelligent Innovation.

CERTIFICATIONS

- Data Science Workshop Certification — IIT Bombay (2025)
